CAPONE & PARTNERS

Trump Accounts: How To Enroll

A streamlined guide to opening a Trump Account.

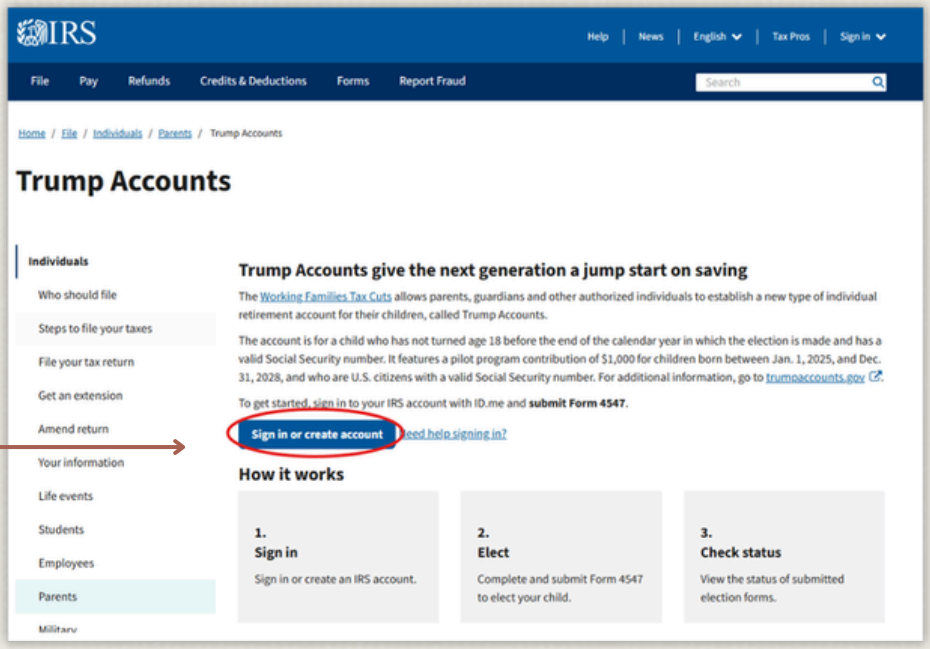
Step One

What You'll Need:

- Child's Social Security Number
- Child's date of birth and address
- ID.me account

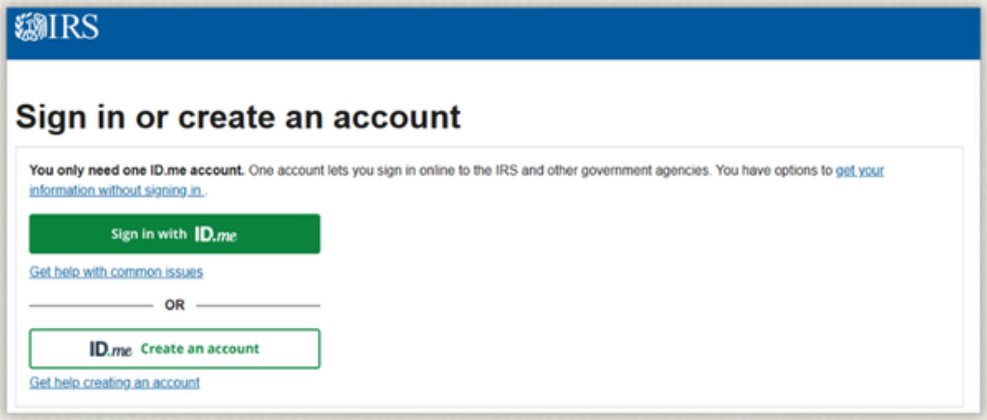
Please visit, **Trump Accounts | Internal Revenue Service** to begin enrolling your children who are 18 years and younger.

CLICK "SIGN IN OR CREATE ACCOUNT"

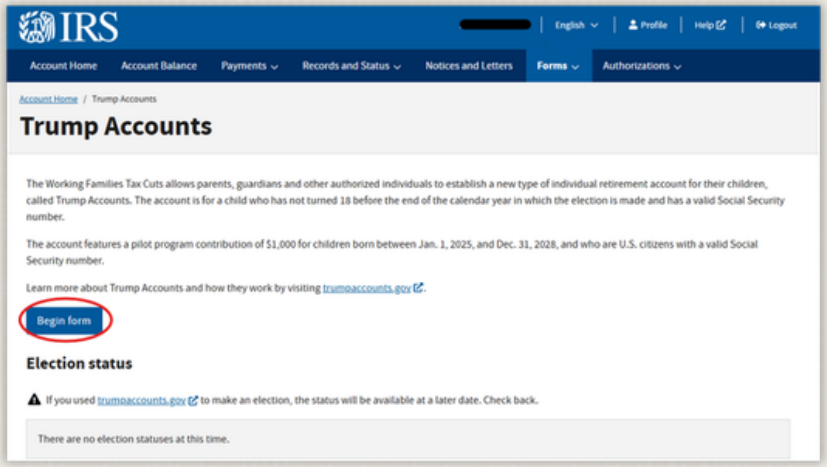


Step Two

Here you will either sign into your **ID.me account** or create one. If you are creating an account please note, they will ask you for a **picture of your Driver's License** and you will have to upload a selfie, so a phone or laptop with a camera is important.



ONCE SIGNED IN, CLICK "BEGIN FORM".

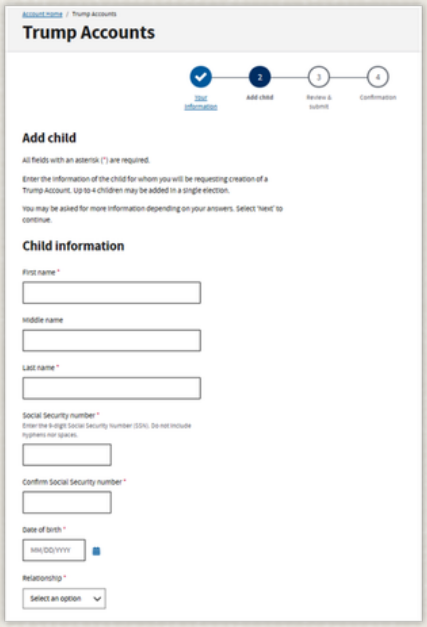


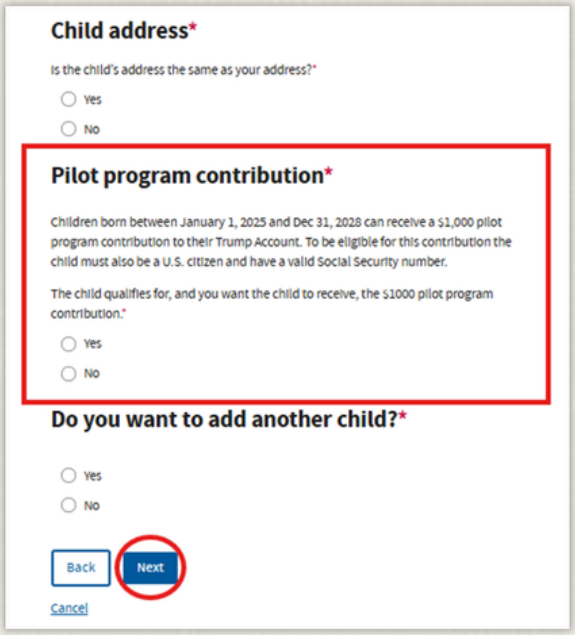
Step Three

Next In The Form:

Step One in the form is completing **YOUR personal information.**

Step Two in the form is **your child's information.** This is also where you attest that your child has or hasn't been born after January 1st 2025 and should receive the $1k contribution. Refer to the **"pilot program" information in the red box.**



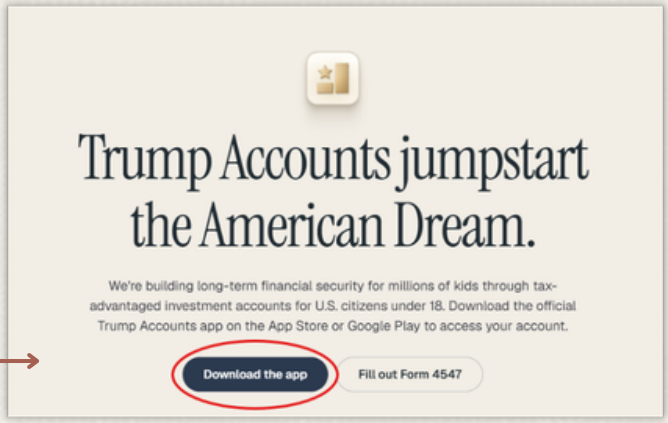


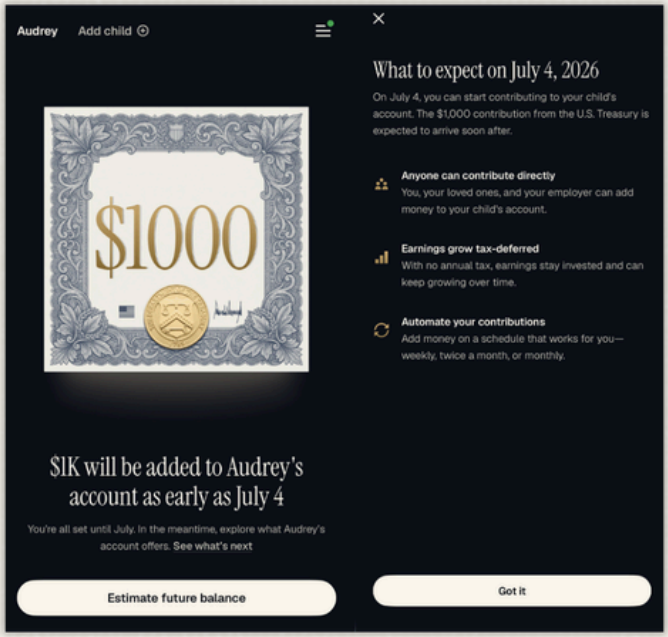
Review & Submit

Once your child's information is filled out you can review and submit. The IRS instructions state that **after your election is accepted, the Treasury Department** (or its agent) **will send you information to activate the account.** That activation includes an authentication process before the account is fully opened.

- You'll **receive an email** from no-reply@trumpaccounts.treasury.gov.
- You'll also **receive an in-app notification** (if you're using the Trump Accounts app).
- The email will contain **instructions to activate** your child's account and complete any remaining steps.

Download The App

You can download the app from the app store, visit **Trump Accounts - Jumpstarting the American Dream.**




In the app, you can track contributions, investment performance, account activity, and manage eligible contributions up to $5,000 annually **after activation.**
